The Guardian Operating Instructions

STEP 1 - Collect Debris

With The Guardian on the forklift sweep the area for metal debris. Debris will be picked up by the Guardian magnet and collect on the bottom of the magnetic sweeper.

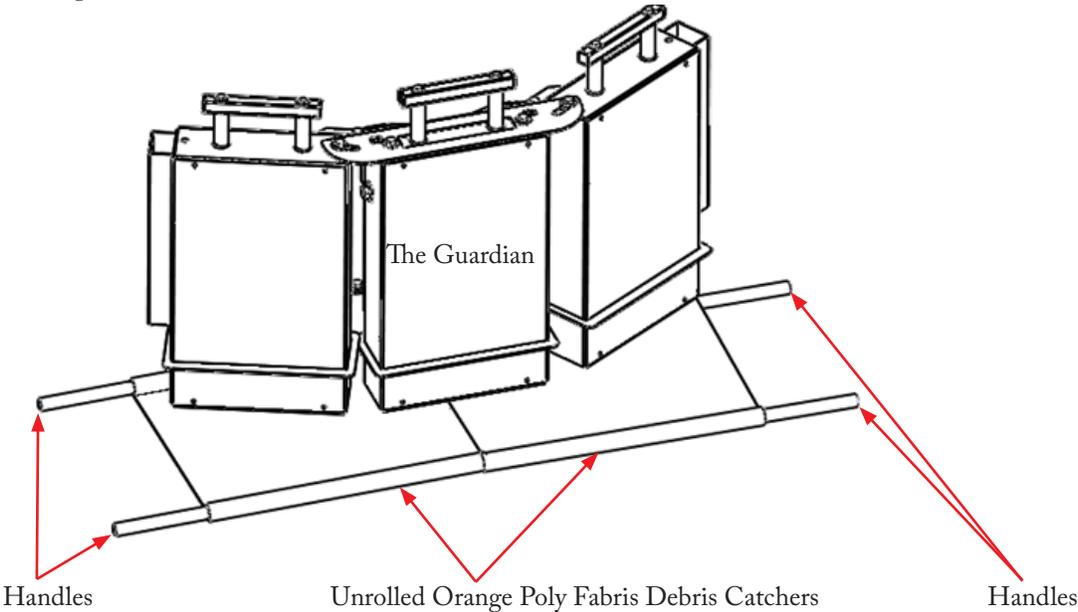

STEP 2 - Remove Debris from Magnet

- A. Remove Orange Poly Fabric Debris Catchers from Holding Pockets located on each side of The Guardian.

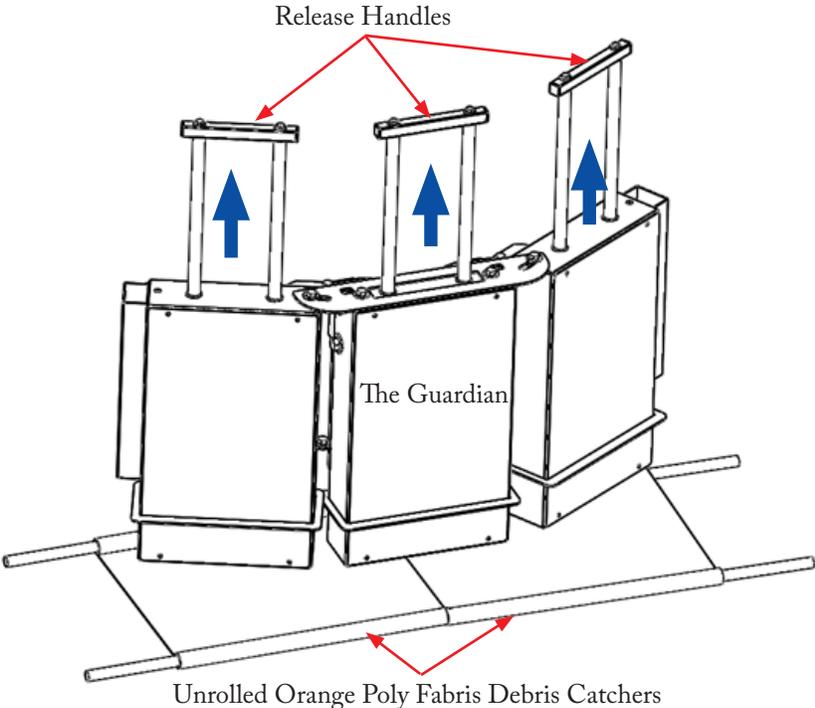

NOTE: Forklift is not shown in images for clarity.

B. Place both unrolled Poly Fabric Debris Catchers on the Ground underneath the magnet.

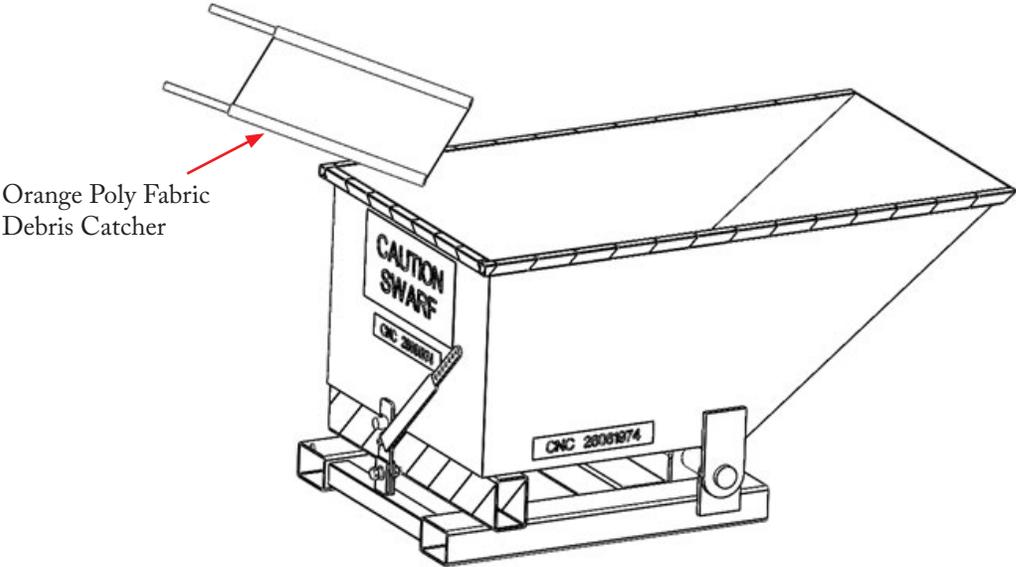

C. Pull upwards on each of the 3 Release Handles until they contact the internal upward stopper. The upward stopper will hold the magnets in the up position. The debris will fall off the bottom of the magnet onto the debris catchers.

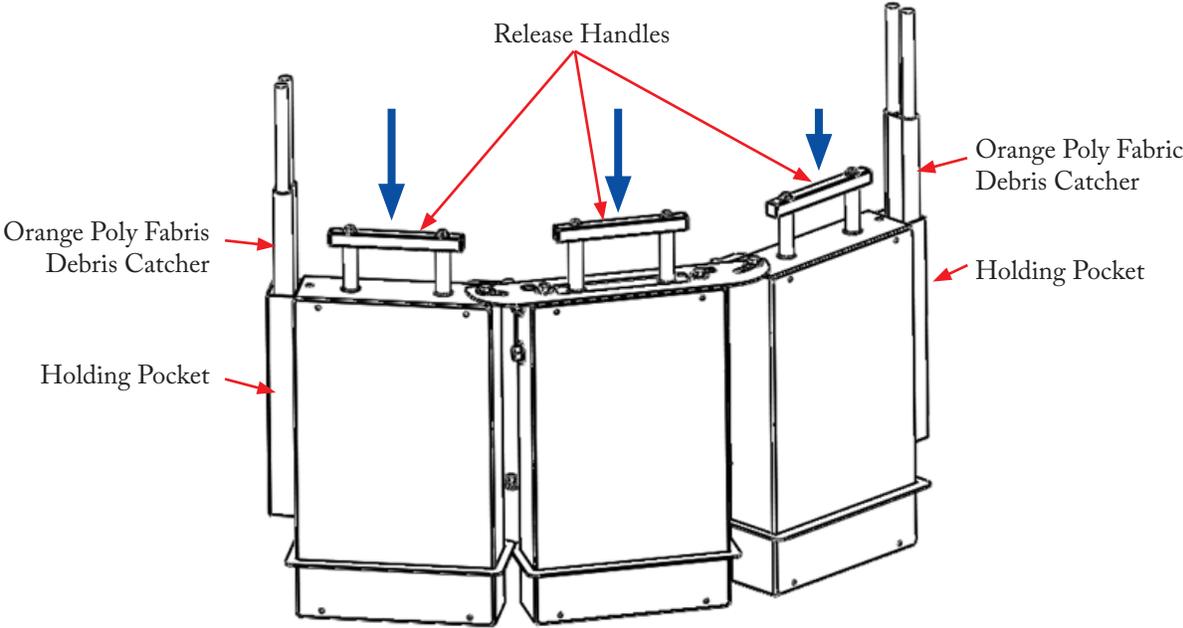

NOTE: Forklift is not shown in images for clarity.

- C. Pickup the Poly Fabric Debris Catchers one at a time and dispose of the collected metal debris into appropriate scrap/swarf/garbage bin.

- D. Roll up and reinsert Poly Fabric Debris Catchers into Holding Pockets and push all 3 Release Handles down to bottom position.

NOTE: Forklift is not shown in images for clarity.

Parts

All parts are available for the Guardian magnetic sweeper directly from Bluestreak Equipment at:
