Longhorn Operating Instructions

COLLECT DEBRIS

Drive the ATV around the debris area with Longhorn magnet attached to the front and collect metal debris.

CLEAN OFF MAGNET

STEP 1- LIFT MAGNET UP

When you have finished cleaning the area or you see that the magnetic sweeper is full of debris, clean debris off of the magnet.

With the ATV in a park position lift up the magnet using the ATV winch.

LONG HORN

CLEAN OFF MAGNET

STEP 2- PREPARE DEBRIS CATCHER

Place the double handled orange poly fabric Debris Catcher underneath the sweeper. This will catch the debris when it drops off the magnet.

CLEAN OFF MAGNET

STEP 3- RELEASE DEBRIS

Make sure the tires on the ATV are straight forward before pulling handle down to release metal debris. This ensures the handle will not hit the tires.

Pull the Debris Release Handles on the sweeper down to release the debris from the sweeper.

You can use either handle on either side of the magnetic sweeper to do this.

REMOVE DEBRIS

After the debris has dropped onto the Debris Catcher, pick up the debris catcher by folding inward to prevent metal debris from falling out.

DISPOSE OF DEBRIS

Empty the Debris Catcher into a recycle bin or container to recycle the metal debris later.

**IMPORTANT**

Return the Debris Release Handle to the upright position before lowering the magnetic sweeper to prevent the handle and magnet from slamming forward.

⚠ CAUTION

Tip-over Hazard

Do not operate ATV at speed when the Longhorn Magnet is attached and in the "UP" position (with the casters off the ground). Depending upon the size/weight of the ATV and rider, sudden braking or steering can cause the rear wheels of the ATV to come off the ground and become unstable due to the weight of the Longhorn magnet on the front of the ATV.

Therefore, if moving the ATV with the sweeper in the "UP" position is necessary, only do so slowly and in a controlled manner with no sudden starts/stops.

Parts

All parts are available for the Longhorn magnetic sweeper from your dealer or directly from Bluestreak Equipment at: www.bluestreakequipment.com
