Yacare

Bluestreakequipment MAGNETICS
APPLICATION DRIVEN DESIGN

Bluestreak Equipment
1645 Hwy #3, Delhi, Ontario, Canada N4B 2W6

Operating Instructions

Connect the sweeper to the tow vehicle with the 2" ball coupler and safety chains. You must use a 2" Trailer ball, unless you purchased an optional Pintle Ring.

The tongue of the sweeper should be as level as possible. This can be adjusted by changing the position of the coupler on the trailer tongue or the ball mount on the tow vehicle.

Operating Instructions

Adjust the sweeping height (distance from ground to bottom of sweeper) between 2" and 5". The lower the better, but make sure magnet is not constantly hitting the ground.

Drive around with magnet and collect metal debris.

Operating Instructions

To clean debris off of the magnet. Stop the tow vehicle.

Push Down on the release handle until the handle stays in the down position.

Pull the magnet forward with the tow vehicle.

The discharged metal debris will be left on the ground.

Operating Instructions

Return debris release handle to upright position and continue sweeping to collect more metal debris.

Maintenance Instructions

Remove rubber cap and using a grease gun apply wheel bearing grease to the grease nipple in each wheel hub once per year.
