# Yak Operating Instructions

## COLLECT DEBRIS

**STEP 1** - Lower magnet until wheels are touching the ground.

## COLLECT DEBRIS

**STEP 2** - Drive around with magnet and collect metal debris.

## CLEAN OFF MAGNET

### STEP 1- LIFT MAGNET UP

To clean debris off of the magnet, lift up the magnet using the UTV lifting device.

### STEP 2- PREPARE DEBRIS CATCHER

Place the double handled orange poly fabric debris catcher underneath the sweeper.

**CLEAN OFF MAGNET**  
**STEP 3- RELEASE DEBRIS**

Pull handle down to release metal debris from the pan.  
You will need to pull handle down all the way until the steel latch locks in place to prevent the handle from slamming back into the upward position.

**REMOVE DEBRIS**  
When picking up the orange polyfabric debris catcher fold it inward to prevent metal debris from falling out.

**DISPOSE OF DEBRIS**  
Dump debris into a bin and Recycle Metal Debris

**IMPORTANT**  
Be sure to return debris release handle to upright position. To do so Hold on to handle and pull up on locked steel latch and slowly lower by hand.

Once handle is in up right position lower the sweeper back down to the ground. You are now ready to continue sweeping
